

Dear Sirs: I respectfully urge the FCC to wholeheartedly reject the NAB's petition 04-160 and to fully support XM's ability to provide the kind of programming that I and my fellow subscribers demand and pay for.

XM is more to me than just excellent entertainment, it provides timely updates wherever I travel that I can obtain with the touch of a button. I can and do count on it when I'm on the road, it makes my trips safer. I know that if I need weather, traffic, or news updates my XM radio will provide it instantly and I don't have to fumble looking for a station in an unfamiliar area.

Please DO NOT let the NAB interfere with free enterprise and my well being.

Sincerely, Don Diehl
